🔒 ETHICX

🎯 Objective

Motivated AI & Machine Learning student seeking an industrial attachment. Passionate about real-world AI-driven solutions and eager to contribute technical skills, innovation, and teamwork in a professional environment.

🎓 Education

2024–2028 **BSc Honors in AI & Machine Learning**, *University of Zimbabwe*, Harare
Coursework: Machine Learning | NLP | Data Structures | Software Engineering | IoT

📜 Certifications

- 2024 **ICDL**, *International Computer Driving Licence, Certificate*
Core digital literacy and computer proficiency certification.
- 2025 **CS50: Introduction to AI with Python**, *Harvard University (edX)*, *Online Certificate*
Search, knowledge representation, ML, neural networks, and NLP.

🔧 Technical Skills

Languages **Python, Java, JavaScript, SQL, PHP, C++**
AI/ML TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV
Skills Data Analysis, MLOps, Mobile Dev, Git/GitHub
Frameworks React, Express, Laravel, Spring Boot, Capacitor
Databases MySQL, PostgreSQL, MongoDB

🚀 Academic Projects

- 2026 **Room Occupancy Detection**, *Smart Systems — ML & IoT*
 - 👁 Real-time occupancy classification via camera feeds using a custom ML model.
 - 🔧 Arduino Uno integration with sensors for automated smart power management.
- 2026 **Tournament Management System**, *Full-Stack Development*
 - 🏆 Sports platform with fixture generation and dynamic leaderboards.
 - 🔗 Backend API integration and relational database architecture.
- 2025 **Image Processing Project**, *Computer Vision — OpenCV*
 - 🔍 Object recognition and classification using advanced preprocessing techniques.

💼 Work & Leadership

- 2024–Present **Freelance Technical Support & Projects**, *Self-Initiated*
 - 🔧 Prototyped ML models and provided hardware/software troubleshooting.
 - 👥 Led collaboration across group-based software development projects.
- 2026 **Workshop Facilitator**, *Cornelius Hope Academy Schools*, Harare
 - 👥 Designed and delivered an AI in Education & the Workplace workshop for educators and staff.
